

Molecular Modeling & Rational Drug Design

Qiaolin Deng

Structural Chemistry, Merck Research Laboratories, 126 E. Lincoln Avenue,
Rahway, NJ 07065, United States

In the talk, I will introduce basic ideas on drug discovery, molecular modeling, and rational drug design. I will use an example to show how we applied molecular modeling methods/tools to help decrease hERG liability in adenosine A2A receptor antagonist design (BMCL, 2015, 25, 2958-2962).
